

Module Handbook

Module Name :	Pharmaceutical Biotechnology
Module Level :	Bachelor
Abbreviation, if applicable :	BIT302
Sub-heading, if applicable :	
Courses included in the module, if applicable :	
Semester / term :	2 / Third year
Module coordinator(s) :	Prof. Dr. Sukardiman, MS
Lecturer(s):	Prof.Dr. Gunawan Indrayanto
	Prof. Dr. Sukardiman, MS
	Prof.Dr.Sugiyanto,MS
	Dr.Mulja Hadi Santosa
Language :	Bahasa Indonesia
Classification within the curriculum :	Compulsory Course / Elective Studies
Teaching format / class hours per week during the semester :	100 minutes lectures, 13 lecture classes/semester
Workload	Total 22 hours a semester
Cedit Points :	2
Requirements :	
Learning goals/competencies :	<p>Knowledge</p> <ul style="list-style-type: none"> – To understand the concept of pharmaceutical biotechnology <p>Skills</p> <ul style="list-style-type: none"> – Critical thinking, comperhensive, valid scientist-academically. – Active to access a new primary information and discuss it also make a decission by scientist-academically <p>Competence</p> <ul style="list-style-type: none"> – To understand and able to apply the concept of the meaning, history and scope of biotechnology – To understand and able to apply the concept of basic metabolism to biotechnology – To understand and able to apply the concept of the production of the drug by the method – To understand and able to apply the concept of the production of medicinal substances by plant biotechnology methods – To understand and able to apply the concept of biotechnology to clean up pollutants and other harmful substances from the environment

	<ul style="list-style-type: none"> - To understand and able to apply the concept of the production of medicinal substances by biotechnological means mammalian cells - To understand and able to apply the concept of the isolation, purification, immobilization and application of enzymes for the production of drugs - To understand and able to apply the concept of cell fusion and genetic engineering in biotechnology
Content :	Pharmaceutical Biotechnology Course presents the material terms of the definition and scope of biotechnology; understanding the system in vitro and fermentation machine and optimization to microorganisms, plant cells, mammals cells; the notion of genetically engineered cell fusion; biotechnology applications and technologies and biotransformation enzymes for the production of medicinal materials; downstream processes and methods of production optimization.
Study/exam achievements :	<p>Student is considered to be competent and pass if at least get 50% of maximum mark of the exams based learning.</p> <p>Final score (NA) is calculated as follow : 50% Exam I + 50% Exam II</p> <p>Final index is defined as follow :</p> <p>A : 100 > NA > 75 AB : 75 > NA > 70 B : 70 > NA > 65 BC : 65 > NA > 60 C : 60 > NA > 55 D : 55 > NA > 50 E : 50 < NA</p>
Forms of Media :	LCD projector, Internet access
